If a serving is 110 calories, 10 percent of 110 is 11. The calories from fat should be 11. This product has 10 calories from fat...making it a less than 10 percent fat product!

Let's look now at sodium. The amount of sodium in a serving should be equal to or no greater than the amount of calories. So in this case, the maximum amount of sodium should be 110mg. This product has only 30, well below the maximum. This is a good choice for a tortilla.
